ABOUT ME

I am a passionate web developer driven by curiosity and continuous improvement. With a growing focus on full-stack development, I actively build and maintain web applications while studying both front-end and back-end technologies. My background in business administration adds a strategic and analytical edge to my development work, helping me understand user needs and optimize solutions effectively.

LANGUAGES

- Spanish - Native
- English - Intermediate

WORK EXPERIENCE

Web Developer

Dolce Amore

I developed the ERP for a local pastry company, which included design, API management, database, and more.

Accounting Administration

Grupo eleva

I carried out the financial records of business events and provided accounting reports.

Administrative assistant

Pescados Industrializados S.A de C.V.

I performed daily administrative tasks, as well as document management, such as packing lists for the merchandise received in the warehouse.
