 Portfolio

 Certifications

Passionate and detail-oriented web developer with a strong commitment to continuous learning and improvement. Currently advancing in full-stack development by actively building and maintaining web applications while deepening expertise in both front-end and back-end technologies. Background in business administration provides a solid foundation in strategic thinking and data-driven decision-making, enhancing the ability to deliver user-centered and efficient digital solutions.

PROJECTS

Nexus

Nexus is a social network inspired by the Gears of War universe. It allows users to log in with their Google accounts, connect with others through a follower/following model, create posts, receive notifications, and send real-time messages. The platform features a design and functionalities that reflect the distinctive aesthetic and atmosphere of Gears of War.

Technologies: React, Django, JavaScript, Python, PostgreSQL, Redis, Tailwind CSS

MarketMaster

An application that simulates the interaction between a customer and an online store. Customers can add products to their cart, view their purchase total, and complete the payment. Includes authentication, a profile system, and virtual currency. Users can view purchase history and buy products.

Technologies: React, Django, JavaScript, Python, PostgreSQL

Dolce Amore

Dolce Amore is a bakery in my city. I developed an ERP system using Django, React.js, and PostgreSQL. It includes authentication, order and inventory management, invoicing, and automated financial reports (cash flow, income statement, and balance sheet).

Technologies: Django, Python, React.js y JavaScript

SKILLS

Languages: Python, JavaScript, HTML, CSS

Frameworks: React, Django, FastAPI, Tailwind CSS

Databases: MongoDB, PostgreSQL

Tools: Git, Netlify, Railway

Core Competencies:

- Systematic analysis and structured problem-solving
- Effective teamwork and communication
- Agile methodology experience
